SUMMARY

SAP BTP Solution Engineer and Technical Lead with 9 years across SAP BTP, SAPUI5/Fiori, and Salesforce — working in the space between developer and solution engineer. Builds the proofs of concept that win client engagements, then delivers the production systems behind them: multi-tenant portals, CAP backends, SAP Build Work Zone experiences, and OData/REST integration. Currently prototyping Joule Agents on SAP Build, and known for turning a rough requirement into something that both wins buy-in and ships.

CORE SKILLS

SAP BTP & Cloud	SAP BTP application development, solution design, SAPUI5, SAP Fiori, SAP CAP, SAP Build Work Zone, SAP Build / Joule Agents, OData & REST integration, multi-tenant portals, Cloud Identity Services / OKTA (SSO), HANA, clean-core strategy
Delivery & Leadership	Technical lead, POC & pre-sales solutioning, requirements gathering, risk assessment, mentoring, integration delivery coordination, technical & functional documentation, architecture diagrams, stakeholder communication, client demos
Development	JavaScript, HTML, CSS, React, Next.js, Apex, Salesforce Experience Cloud, Git / GitHub, SFDX, release management (Dev / QA / UAT / Prod)
Design	UX/UI design, Design Thinking, Figma, Axure RP, prototyping, Adobe Creative Suite

EXPERIENCE

TCS — Milford, OH	AUGUST 2017 – PRESENT
<i>Global IT consultancy — delivering across SAP BTP, SAPUI5/Fiori, and Salesforce client engagements.</i>	
SAP BTP Solution Engineer & Technical Lead	FEB 2024 – PRESENT
- Lead a BTP development team delivering a manufacturer-facing reporting portal and supporting integrations — owning solution design, requirements, risk, and delivery timelines, and coordinating integration delivery as task lead. - Delivered a multi-tenant SAP Build Work Zone portal consolidating 22 SAPUI5 apps into a single authenticated experience, including the UX/UI prototype and app architecture. - Designed and built an SAP CAP service exposing multiple endpoints over HANA synonyms. - Designed and configured Cloud Identity Services as an authentication proxy with OKTA, plus 3 admin apps handling onboarding and OKTA lifecycle events. - Building a Joule Agents proof of concept on SAP Build, applying emerging SAP AI within the BTP ecosystem. - Authored an internal clean-core strategy and development guide, and produced SAP solution content featured at SAP Sapphire. Mentors junior developers on the team.	
SAP BTP Developer & Consultant	OCT 2021 – JAN 2024
- Developed custom SAPUI5 applications and supported BTP portal and integration work across multiple client engagements. - Built a SAPUI5 solution for a national rail company to input and track supplier fuel costs, reducing manual-entry errors and improving reporting accuracy. - Ensured reliable data flow between SAPUI5 front ends and backend SAP systems via OData services, enabling real-time updates and reporting. - Built an SAP SuccessFactors employee-offboarding integration and authored the supporting technical documentation and integration architecture diagram. - Designed and built SAP BTP proofs of concept that converted into signed client engagements, spanning capability demos and use-case discovery.	
Salesforce Experience Cloud Developer	NOV 2020 – SEP 2021
- Built a Salesforce Experience Cloud site for customers and partners to view and manage warranty tickets for router products. - Combined out-of-the-box components with custom development for an intuitive, requirement-driven experience. - Developed Apex to handle complex business logic, improving ticket management and system performance. - Managed releases across Dev / QA / UAT / Prod using GitHub and SFDX.	
Salesforce Experience Cloud UI Developer	JUL 2019 – MAR 2020
- Built a customer-facing interface for online bill payment and service management for a large utility company. - Delivered UI consistency across a solution integrating Marketing, Sales, and Service Cloud. - Contributed to a 20% increase in online service interactions within the first quarter.	
SAPUI5 Developer	MAY 2018 – SEP 2018
Built a standalone SAPUI5 app for a large auditing firm to list and track clients and opportunities, improving access to client information and operational efficiency.	

EDUCATION

Full Sail University — B.S., Web Design & Development	2015 · WINTER PARK, FL
